The instructor participants discussed the concepts of possibility and constraint 15 as they relate to the development of an embodied use of movement in their students Fig. Clinical instructors agreed that students with prior experience in athletics, dance, or other movement-related activities understood their own bodies in ways that facilitated learning to use movement in practice.

Inthe"control"condition,participantswereinstructedtosinglyobserve Brooks argued in the mids that these symbolic approaches were failing because researchers did not appreciate the importance of sensorimotor skills to intelligence in general, and applied these principals to robotics an approach he called " Nouvelle AI ". In the control condition, participants swung the pendulum without performing the "sentence judgement task.
