Dilemmas involving the applicability of informed consent the use of deception, and the protection of privacy and confidentiality are common in social science research. However, a further determination must be made before the use of deception in research can be justified. Different citizen science projects purport to accommodate many of the features. One example often cited is the work of Bruno Bettelheim who

studied a German concentration camp while he was interned against his will during the Nazi period. Baele for example recommends this form of consent. SpringerSeriesinSocialPsychology. The latter two were the respective founders of the first American bioethics centers
