In the meantime, to ensure continued support, we are displaying the site without styles and JavaScript. The spielberger state-trait anxiety inventory stai : the state scale in detecting mental disorders in geriatric patients. Kempen, and J. This is consistent with the significant effect of medication in the nondepressed PD group, mentioned earlier. While some patients appear to improve their apathy symptoms by taking dopaminergic medications, those with DOPA-resistant apathy demonstrate structural changes in the basal ganglia, including atrophy of the nucleus accumbens and head of the caudate
